Professional Summary

Technical Support professional with 9+ years' experience delivering high-touch L1/L2 support in financial services and enterprise environments. Proven ability to troubleshoot complex Windows and macOS issues, support executive stakeholders, and operate confidently in high-pressure, time-critical settings. Known for driving operational improvements, strengthening asset governance, and translating technical issues into clear business outcomes. Strong background supporting identity management, endpoints, cloud-based VDI, and onsite infrastructure within ITIL-aligned environments, with a strong focus on clear technical documentation and self-service enablement.

Technical Skills

- **Service Desk & End User Support:** Deskside and remote support; Windows & macOS; iOS/mobile devices; AV & meeting rooms; executive support; trade floor systems and applications
- **Identity & Access Management:** Active Directory; Azure AD/Entra ID; MFA; RBAC; Exchange Admin; onboarding/offboarding; SailPoint, PasswordSafe, BeyondTrust
- **ITSM, Endpoint & Tooling:** ServiceNow; Jira; Microsoft Intune; SCCM; ITIL-aligned workflows; incident, request, and asset lifecycle management
- **Documentation & Knowledge Management**: Creation of self-service knowledge articles and end-user guides; Technical documentation including system design overviews, process mapping, runbooks, and operational reports; Strong experience publishing and maintaining documentation in Confluence and SharePoint
- **Scripting, Cloud & Networking:** PowerShell automation; batch scripting; AWS Workspaces (VDI); Microsoft 365/Copilot; VPN, DNS, DHCP, TCP/IP; command-line diagnostics; Onsite infrastructure including server rooms, switches, firewalls, and CCTV

Work Experience

End User Support Specialist — ASX Limited Oct 2024 – Present

- Primary escalation point for complex L1/L2 incidents across Windows, macOS, iOS, and mobile restoring service rapidly with structured root-cause analysis to minimise business disruption.
- Administer identity and access across Active Directory, Azure AD/Entra ID, and Exchange Admin (onboarding/offboarding, MFA enforcement, and RBAC) for employees and external consultants.
- Own end-to-end IT asset lifecycle across 2,000+ leased devices using ServiceNow and Jira provisioning, compliance, end-of-life, and recovery.
- SME for AWS Workspaces (VDI) supporting 300+ onsite and offshore consultants, onboarding, IAM configuration, and access issue resolution.
- Deliver AV and meeting room support for executive meetings, town halls, and high-visibility investor events.

- Use PowerShell automation to streamline update deployments and reduce recurring incident volumes.
- Develop and maintain audit-ready technical documentation and self-service knowledge articles, improving first-contact resolution and providing accurate, structured content to support Microsoft Copilot responses.

Project Coordinator — ASX Limited Sep 2022 – Oct 2024

- Led enterprise-scale technology migration and transition initiatives across operations and business teams, ensuring data integrity, audit compliance, and minimal disruption.
- Facilitated Go/No-Go decision cycles with senior leadership; articulating risks, dependencies, timelines, and business impacts; produced audit-ready quarterly reporting and enabled DocuSign onboarding workflows to reduce manual exceptions.

Office Operational Support — Australian Investment Exchange (AUSIEX) Sep 2021 – Sep 2022

- Provided application and operational support for wholesale trading platforms, ensuring system availability, data accuracy, and strict process adherence.
- Supported onboarding, KYC verification, and account maintenance across multiple account types in a time-critical trading environment.

Audit Office Support — Commonwealth Bank of Australia Dec 2019 – Sep 2021

- Supported testing and validation of enterprise banking systems, performing structured root-cause analysis and escalating defects to minimise risk and business impact.
- Collaborated with technology and operations teams to document issues, validate fixes, and support system rollouts with minimal disruption in a regulated environment.

Desktop/Application Support — National Australia Bank (nabtrade) Jul 2017 – May 2019

- Provided application and desktop support in a high-security trading floor environment, resolving issues across the nabtrade platform and IRESS Trader, including performance, access, and connectivity incidents.
- Managed service desk tickets end-to-end, prioritising trading-critical issues, maintaining clear resolution documentation, and supporting user onboarding and application access for trading floor staff.

Store Manager — Contempo Investment Pty Ltd Sep 2014 – Feb 2016

- Deployed, maintained, and troubleshot in-store technology including device, POS payment systems, CCTV, and digital displays, ensuring 100% system uptime across multiple locations.
- Managed 3 retail stores and a team of 12 staff, overseeing hiring, training, sales performance, inventory control, and producing accurate operational reports for management decision-making.

Education & Certifications

MBA (Major in Finance), University of Technology Sydney (UTS) Completed May 2020

AWS Cloud Practitioner Completed Aug 2025

AWS AI Practitioner Expected Mar 2026

Projects & Key Achievements

In 2025 PowerShell Automation | ASX Limited

Context During a business restructure, recurring access and update requests generated a high volume of repeat tickets, consuming support capacity during peak trading hours.

What I Did

- Use PowerShell scripts to automate routine tasks such as creating distribution lists and managing mailbox groups.

Outcome Significant reduction in repeat tickets and manual processing, freeing support capacity during critical periods.

Skills: PowerShell, ServiceNow, ITIL problem management

In 2025: AWS VDI Scale over 300+ Consultant Onboarding | ASX Limited

Context A large cohort of offshore and onsite consultants required secure VDI access. Manual onboarding was error-prone and delaying project start dates.

What I Did

- Acted as SME for AWS Workspaces: owned provisioning, IAM configuration, and access troubleshooting.
- Standardised the onboarding workflow and built a repeatable provisioning checklist.
- Enforced RBAC policies in collaboration with security and infrastructure teams.
- Supported APEC offshore teams remotely across time zones throughout the rollout.

Outcome Significantly reduced per-user setup time. Backlog of IAM issues resolved. Standardised process adopted as team default.

Skills: AWS Workspaces, IAM, RBAC, Active Directory, Azure AD/Entra ID, remote support

In 2025: Asset Management Lifecycle | ASX Limited

Context Gaps in the asset register created compliance risks and caused delays during audit cycles. Hardware refresh activities were not consistently tracked end-to-end.

What I Did

- Audited full device register for 2,000+ leased assets, reconciling physical inventory against records.
- Built workflows dashboard collaborate with engineer teams in ServiceNow for provisioning, compliance check-ins, end-of-life flagging, and recovery in real time and trained team members
- Produced audit-ready reporting aligned to global IT governance standards via Confluence

Outcome Asset register brought to full compliance ahead of audit cycle. Real-time visibility into device status and refresh requirements and significantly reducing reactive asset queries.

Skills: ServiceNow, Jira, ITIL, IT asset management, audit compliance, process design

In 2023: Salesforce CRM Restructure | ASX Limited

Context ASX's Salesforce CRM held a large volume of unstructured, hard-to-navigate data across multiple categories, the dataset needed to be clean, logically grouped, and usable. But it was disorganised and inconsistent, making it difficult for the team and leadership to work with.

What I Did

- Cleaned and restructured Salesforce CRM data by removing duplicates and remapping fields using UX principles.
- Delivered a clear, consistent dataset using Excel pivot tables for publication on the ASX website.

Outcome Delivered a clean, well-structured dataset that was immediately usable by leadership and stakeholders. Reduced data errors and saved the team significant time previously spent navigating disorganised records.

Skills: UX/UI design, Excel pivot tables, Salesforce CRM, data structuring, stakeholder communication
